

## Roland EngraveLab Software

### Overview

**EngraveLab** provides the modern engraving shop with creative freedom and an efficient workflow. This powerful design and production software comes loaded with all the right tools for engraving trophies and awards and signs, including 65 import filters, 1100 fonts with WYSIWIG text composition, 100 engraving fonts, a 5000-piece clipart library, and a variety of automatic fill routines. It can also generate Braille for ADA signage, trace raster-to-vector images, and automatically create single or multiple plates per sheet with a special badges function.

### Features

- **Fill Routines**

Automated fill routines including s-sweep, line sweep, spiral and island fills add another dimension to your text, logos, or artwork. EngraveLab allows you to use more than one fill per job.

- **Auto Layout**

The Auto Layout feature easily creates single and multi-line engraving plates. Work directly on screen using the "What You See Is What You Engrave" (WYSIWYE) interface. Easily add graphics and logos to your jobs, and create a library of layout templates for future jobs.

- **Block and Shape Nesting**

Nesting your work makes your business more profitable by optimizing space and using material efficiently. You can even handle those big production jobs, as nesting will create as many plates necessary to fulfill the order.

- **Edit Fast & Easy**

Flexible node editing tools quickly simplify and clean up imported or scanned artwork.

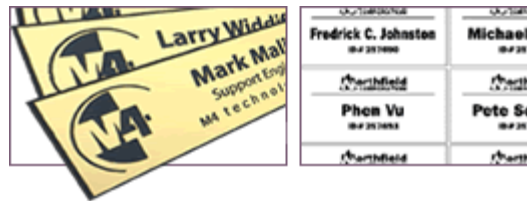

- **65+ Import / Export Filters**

EngraveLab includes industry standard import/export plus the ability to import stroke width. A seamless CorelDRAW® interface so that you transfer files easily without file degradation. Import filters include EPS, AutoCAD DXF, CMX, G-Code, GenericCAD DWG, HPGL / DMPL PLT, TIF, JPG, BMP, SCV, WMF, WPG, PRN, PCD, PCX, GIF, FS...and many more!

- **1100 Fonts & 5000 + Clipart Images**

EngraveLab includes a large font and clipart library that has been meticulously designed with great accuracy so that they are engrave or cut ready. It will also support Windows true type fonts, Adobe fonts and Corel WFN fonts.

- **Badges & Serialization**

Use the Badges feature to create single or multiple plates per sheet. Text substitution and serialization have never been this easy. Create one template and let the Badges feature substitute the selected text. Foreign language text substitution is effortless using Windows XP and Unicode text support.

- **WYSIWYG Text Composer**

With EngraveLab, you simply type text on screen. Choose from over 100+ engraving fonts and edit their properties (font, style, height, kerning, etc.). EngraveLab easily conforms text to an arc or a path.

- **Braille Translator**

Convert text into Grade 2 Braille with a single click of the mouse! The Braille Drill tool can automatically locate individual dots and drill a point to a pre-determined depth. Creating Braille signage has never been easier.
